

Molybdenum Consortium

An initiative of the International Molybdenum Association

At the First Meeting of the Molybdenum Consortium Committee, held in London on 19 December 2007, members voted their approval to:

- 1) **reduce** the minimum annual fee for the 4 year period 2007-2010 from US\$25,000 to **US\$15,000** with effect from 2007 onwards. (It has been possible to make this reduction because the number of companies joining the Consortium {37 to-date} exceeded expectations in terms of the initial financial assumptions about Consortium funding).

- 2) **In line with 1) above, the Molybdenum Consortium is extending, until 31 January 2008,** the period during which companies can apply to join MoCon and not incur the 'late joiners premium' (50%).
