**Disodium Molybdate**

**EINEC No. 231-551-7 CAS No. 7631-95-0**

Note: hydrates (e.g. sodium molybdate dihydrate, Na<sub>2</sub>MoO<sub>4</sub> · 2 H<sub>2</sub>O) are also considered under this registration, although they may have different CAS Numbers)

The purpose of the **Pre-SIEF** is for REACH Pre-Registrants to agree on **sameness** of substance.

Pre-Registrants that can agree that they have the same substance will then pass into the Substance Information Exchange Forum (SIEF) for this substance, where the data-sharing dialogue begins.

Pre-registrants that consider they do not have the same substance will be grouped together by the Pre-SIEF Facilitator for further discussion and potential entry into sub-SIEFs or another SIEF.

**Please check that your pre-registered substance matches the typical composition below.** You will shortly receive an E-mail from the Molybdenum Consortium for you to take part in the **'Substance Sameness Questionnaire'**. Your response to that survey will be your participation in the Pre-SIEF 'sameness' discussion.

<b>Substance:</b>	<b>Disodium Molybdate</b>
Synonyms/Trade Names:	Sodium Molybdate, SoMo
Chemical Formula:	Na <sub>2</sub> MoO <sub>4</sub>
<b>TYPICAL COMPOSITION</b>	
<b>Parameter / Component</b>	<b>in % (mass) Based on the predominantly marketed dihydrate form</b>
Purity	min 98.0
Molybdenum	min. 39
Chloride	< 0.05
Sulfate	< 0.1
Phosphate	< 0.05
